## QX-3 LOITERING MUNITION

ROBUST SUPPORT.  
RELIABLE  
FIREPOWER.

The ADASI QX-3 loitering munitions system puts a powerful aerial capability in the hands of infantry and special forces through a 20-kg UAV with a capacity of up to four precision-guided munitions. With onboard video and multiple weapons, the system empowers operators to respond to changing realities in real time, providing robust support to ground operations.

Transportable by light vehicle, the system offers a stand-off range of 40 km and an endurance of up to 40 minutes for extended mission scenarios.

# SPECIFICATIONS

## KEY FEATURES

- Extended loitering time
- Onboard video surveillance
- Transportable via light vehicle
- Payload of up to four precision-guided bombs

## SPECIFICATIONS

<b>Ceiling altitude</b>	2,000'
<b>Cruising altitude</b>	1,000'
<b>Range</b>	40 km
<b>Endurance</b>	40 min
<b>Maximum take-off weight</b>	20 kg
<b>Payload mass</b>	6 kg
<b>Engine type</b>	Electric
<b>Guidance</b>	GNSS, with option for TV/Thermal Camera tracker (seeker)
<b>Communication link</b>	Video and control data capability
