

ADASI

QX-4 LOITERING MUNITIONS

ROBUST SUPPORT.
RELIABLE
FIREPOWER.

The ADASI QX-4 loitering munitions system puts a powerful aerial capability in the hands of infantry and special forces through a 20-kg UAV with a capacity of up to two precision-guided munitions. With onboard video and multiple weapons, the system empowers operators to respond to changing realities in real time, providing robust support to ground operations.

Transportable by light vehicle, the system offers a stand-off range of 40 km and an endurance of up to 90 minutes for extended mission scenarios.

SPECIFICATIONS

KEY FEATURES

- Extended loitering time
- Onboard video surveillance
- Transportable via light vehicle
- Up to two precision-guided bombs

SPECIFICATIONS

Ceiling altitude	2,000'
Cruising altitude	1,000'
Range	40 km
Endurance	90 min
Maximum take-off weight	20 kg
Payload mass	1 x 5 kg / 2 x 2.5 kg
Engine type	Electric
Guidance	GNSS, with option for TV/Thermal Camera tracker (seeker)
Communication link	Video and control data capability
